We recently purchased a patio home with an unfinished lower level. After speaking with the builder of the patio home, we contacted Kenton Pass.

Kenton joined us as we walked through the patio home before we actually closed on it. We discussed changes to be made, particularly in the lower level. Kenton made many worthwhile suggestions. After drawing up plans, we met and accepted these.

Kenton said the project would begin the day after we closed on the house. His materials and framer were there at the new home the morning following our closing at 7:00 a.m. ! Kenton and his subcontractors continued to be on time showing a lot of professionalism, knowledge, and patience. Not only did they show professionalism with us, but took several steps to make the project least invasive to the homeowner's association.

Kenton made many trips to the home keeping us informed of the progress and any suggestions. Happily the project was completed on time. We were most pleased with the total remodeling project. Without question, should we have another remodeling project, we definitely would have Kenton Pass do it.

Kenton Pass is indeed a kind, thorough, caring contractor.

Sincerely,

Larry and Libby Fink
