To Whom It May Concern:

We are writing this letter as a positive recommendation for Kenton Pass. We worked closely with Kenton over the past few months during the renovation of our house located at 1215 North Institute in Colorado Springs.

Although the scope of the work we contracted from Kenton was limited, he was as responsive and concerned as if it were a large project for him. His expertise in remodeling an older house was invaluable.

Kenton was very willing to share his contacts and sub contractors with us which we used and were more than satisfied with.

Kenton's communication with us was as needed and he was always easy to contact. We were always able to get information as to when various parts of the project would be completed. Even when weather interfered with the project, he was able to be within one or two days of expected deadlines.

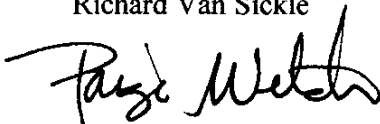

All in all, working with Kenton was a pleasure. We believe that his knowledge of older homes and the number of contacts he has allowed us to create the outcome we were looking for, within our budget.

Please feel free to contact us at 719-216-2012 if you have any further questions.

Sincerely,

Richard Van Sickle

Paige Webster.
